

Please leave xm radio as it is. I subscribe for services I can't get anywhere else when I'm traveling up and down the east coast. It tells me the weather where I'm heading, back home and all around, and also warns of traffic snarls around major cities. I also use it for Cnbc and Bloomberg News for updates on markets and international news I can't get anywhere else without scanning up and down the dial which is very annoying in traffic. Regards, wm.a.cannon
